## BONUS MANAGER AND REBATE PROCESSOR

Ready solution for retail brokers as a stand-alone application running on your servers as service, ensure smooth operation and zero load for your MT4 and MT5 servers.

### Bonus Manager for Metatrader 4 & 5

A Bonus manager Metatrader application, compatible with both MT4 and MT5. It is designed to control always that selective group of clients using a credit bonus will never be able to lose bonus funds. In more technical terms the equity of a trader's account is equal to their credit balance, it triggers a specific condition where the bonus associated with that credit is effectively canceled out.

- ✓ Monitor and Manage Credit Bonus
- ✓ Cancel Out Bonus when real money are lost from account
- ✓ Configurable on per Account Level Configurable on per Metatrader Group Level
- ✓ Can Include/Exclude Accounts
- ✓ Protects Brokers from Bonus Hedging Abus

## REBATE PROCESSOR

Brokers have the ability to pay selective group of clients a reward for every position they close.

### Why choose Rebate processor Application

The addition of a rebate processor alongside the Bonus Manager, our solution becomes unparalleled in the market, providing you with an unbeatable advantage and the ability to negotiate more competitive bonus terms with your clients.

- ✓ Pays Rebates on every closed Lot
- ✓ Credit Out and Balance In Transactions
- ✓ Makes Bonus Withdraw-able safely
